KUBOTA ZERO-TURN DIESEL GARDEN MOWER

A hybrid zero-turn mower that combines ultra-maneuvrability with ultra-efficient, Two-Blade Glide Cut rear discharge for higher productivity.

GZD15

finish the day's job faster so you can be

Quick Clean System

Our Quick Clean System raises productivity by making it a snap to clear even wet grass without leaving the driver's seat. Simply use the lever to easily clear a path to the grass collector.

Kubota Diesel Engine

Amazingly rugged and dependable, the GZD15 zero-turn mower's fuel-efficient, 2-cylinder diesel engine lets you run longer with less fuel. Plus, the engine's 15-horsepower rating gives it the brawn to run smoothly for extended periods—while handling even tough jobs.

Large Capacity Fuel Tank

Requiring less stoppage for refueling, our large-volume, 20-liter fuel tank will keep you operating longer. Combine this with our fuel-efficient, high-torque diesel engine, and you've got the makings for a healthier bottom-line profit.

Deep Profile Mower Deck

Equipped with a deep mower deck (123.4 mm inner), the GZD15 zero-turn mower cuts faster—in fact, even tall, thick, or wet grass is no challenge.

Compact and Low Cost

The GZD15's compact and lightweight design makes it one of the easiest mowers to transport. And, loaded with cost-efficient features, it's sure to increase your profit by keeping overhead down.

The GZD15 zero-turn mower. Lets you

Efficiency

Impressive results quickly and economically.

The Glide Cut Rear-Discharge System

Unlike other side-discharging collecting mowers that use a power-draining turbine, by employing Kubota's unique Glide Cut System, our GZD15 smartly utilises its two blades to cut, and then channel directly into the integrated rear grass catcher.

The Zero-Turn System

For incredibly nimble navigation, especially in and around flowerbeds, trees, and hedges, the Zero-Turn System provides the GZD15 with an easy-to-operate, dual-levered steering that has a 360-degree turning radius.

High Traveling Speed

With a top travel speed of 13.5 km/h, you'll cruise from job to job faster. And thanks to the GZD15 zero-turn mower's high cutting performance and fuel-efficient 15-hp diesel engine, you can finish your day's job faster than ever.

Mower Lifting Height

By utilising a pedal-operated hydraulic lift, the mid-mount mower can be quickly raised up to 135mm to provide higher ground clearance, and lowered just as easily.

Large Volume Grass Collector

You'll spend less time dumping grass and more time cutting it with our generously-sized, 400-liter grass collector.

Parallel-Link Grass Collector Lifting System

With the high dump (HD) model, its convenient, hydraulic Parallel-Link System moves the grass collector vertically, allowing consistent, no-spill dumping at variable heights (0.9 m~1.8 m). Adjusting the system downward permits unloading under trees or other obstacles, while adjusting it upward to its maximum height of 1.8 m lets you unload into truck beds.

The ultra-maneuvrability of our zero-turn mower. The ultra-efficient operation of our rear-discharging, Two-Blade, Glide Cut mower. We combined these two essential features with a long list of others to create an economical, high-performance zero-turn mower — the hybrid Kubota GZD15. And with its ability to deliver a high level of efficiency, endurance, and ergonomics, it's no wonder the GZD15 has become the most popular choice of both professionals and non-professionals alike.

A scenic garden with a stone fountain, a pond, and a church in the background. The fountain is a multi-tiered stone structure with water cascading into a pond. In the foreground, there is a stone well with a black wrought-iron post. The garden is lush with green grass, various shrubs, and trees. In the background, a church with a steeple is visible.

We combined the best of both worlds to create a zero-turn mower that delivers incredible Efficiency, Endurance, and Ergonomics.

GZD 15

Specifications

Model		GZD15-LD	GZD15-HD
Engine	Model	Kubota Z602	
	Fuel type	Diesel Liquid-cooled (2 cyl.)	
	Displacement	599 cc (36.5 cu. in.)	
	Power	15 HP (11.2kw)	
	Fuel capacity	20 ℓ	
	Battery	12V (450 CCA)	
	Alternator	15 Amps	
Tractor	Mower position	Mid-Mount	
	Front axle pivot	Standard	
	Type	4Wheels-2WD	
	Tyre size Front/Rear	15×6.0-6 / 20.0×10-8	
	Tread Front	770 mm	
	Tread Rear	950/850 mm 2 positions	
	Wheel base	1285 mm	
	Overall Length	2785 mm	
	Overall Width	1200 mm	
	Overall Height	1115 mm	1345 mm
	Weight (w/mower & GC)	510 kg	540 kg
Drive Train	Speed Front/Rear	0–13.5 km/h / 0–10 km/h	
	T/M drive system	Shaft drive	
	Mower drive system	Shaft drive	
	Drive system	2-HST	
	Steering style	2-Hand Levers	
	Parking brake	Wet multi-discs, Mechanical equalising brake system	
	Turning radius	0 m	
PTO	PTO clutch	Hydraulic Wet Multi Discs	
	PTO brake	Hydraulic Wet Single Disc	
Mower	Cutting width	42" (1067 mm)	
	Lift system	Hydraulic	
	Mount system	Parallel Linkage	
	Blade drive system	Hex belt, gear	
	Cutting height	1–4 in. (1/4"), 4–5 in. (1/2") (25–102 mm (6 mm), 102–127 mm (13 mm))	
	Cutting height adj.	Dial	
	Max. Mower lift height	135 mm	
No. of blades	2		
Grass Collector	Type	Low dump/Hydraulic	High dump/Hydraulic
	Capacity	400 ℓ	
	Lift height (MAX)	—	1.8 m (5.9 ft)
