

LITTLE WONDER®

Professionals Demand Little Wonder.™

High Performance

Top Loading Commercial Vacuum

The Little Wonder vacuum has superior suction and airflow due to its 16.75" / 42.5cm, 5-blade reverse angled impeller and unique scrolled housing design. This vacuum picks up almost anything found on pavement or turf including leaves, litter, plastic bottles and even sand and grit. The Top Loading bag design provides a more efficient and cleaner operator environment. Great for residential cleanup, Commercial sites, Hotels, Car Parks, Sports Facilities, Parks and Grounds Maintenance.

Easy to use band clamp.
(No Zips)

Optional nozzle side guard

Wide opening bag,
easy to unload

Wander hose attachment

LITTLE WONDER® POWER PRODUCTS

High Performance Vac

Work Cleaner

The operator stays cleaner because our design funnels airflow and material down into the bag. Air escapes the bag below the exterior vinyl bag skirt, directing dirt and dust away from the air you breathe and clothes you wear. Loading material from the top also compacts it better so there's more debris in the bag.

Advanced Materials & Construction

We use the same material for our internal fan housing liner as mines and quarries use for conveyor belts. A highly abrasion resistant rubber belting to absorb wear and impact from the material being vacuumed through the fan and into the collection bag. The liner protects out housing from premature wear and reduces noise. Balanced components provide low HAV vibration levels.

Heavy Duty for Industrial Use

This vacuum features 12 gauge steel construction, a durable powder coat finish, pneumatic tyres, and has a 1 1/4" / 3cm tubular handle with an anti-vibration wrap grip. The 29" / 74cm pickup nozzle floats over obstructions and the polymer material is lightweight and durable. Intake height is easily adjusted without tools with a threaded screw knob adjustment.

The Rest of the Story

Picking up the material is only half the battle—the wide opening 8 bushel / 282 Ltr nylon bag has an easy to use lever-actuated band clamp that attaches securely and lets you empty easily without clogging; bag re-attaches quickly. Simple quick release bag design no zips to attach the collector bag.

Better By Design

- Outstanding suction
- Great compaction
- Easy to empty
- Picks up leaves, plastic bottles, litter, sand and gravel
- Zipless bag design
- Briggs and Stratton Vanguard Engine

Accessories

- Intake Hose Kit, 7" / 18cm diameter x 12ft / 3.6m
- Nozzle Side Guard Kit
- Felt Bag Liner Kit

Product No.	5612	Unit Size	62" / 157cm long x 29" / 74cm wide x 40" / 120cm high
Engine	Briggs & Stratton Vanguard	Weight pounds/kg	184 / 84
Power	6.5 HP	Warranty	2 Year Consumer 2 Year Commercial
Fuel Capacity	7 Pt / 4 Ltr	Accessories	Intake hose kit – 600020 Nozzle side guard kit – 600035 Felt bag liner kit – 600050
Nozzle Width	29" / 74cm		
Housing Liner	444 Belting		
Bag Capacity	8 Bushels (282 Ltr)		
Wheels	10" / 25cm Pneumatic front with tubes 12" / 30cm Pneumatic rear with tubes		

*Engines warranted separately by engine manufacturer.

The power ratings are provided by the engine manufacturer. Actual power output is dependant on many factors including engine rpm, air density and engine condition.
