

Mantis®

BunkerMaster

BunkerMaster saves time, getting bunkers back into play after bad weather in a fraction of the time taken using traditional tools.

Powerful engine

Easy to use

60 Sprung steel tines

Let BunkerMaster do the work!

Mantis BunkerMaster

BunkerMaster lifts the top 30mm of sand and never digs in. Designed to work away from the operator for maximum control. The powerful 4-stroke engine has the torque to spin the spring tines at 200rpm.

Use BunkerMaster to remove ingrained sand and thatch easily from all awkward banks. Three times as fast as hand rakes and a lot less tiring.

Main Features – Mantis Bunkermaster

- 35cc Subaru 4-stroke engine
- 60 sprung steel picks rotating at 200rpm
- 1 Year warranty

Centrifugal clutch

Our unique centrifugal gives complete operator control.

Powerful, rugged engine

The new advanced engine is almost completely enclosed in its rugged housing. Vulnerable parts are thoroughly protected against abuse to ensure trouble-free operation.

Sealed electronic ignition

Sealed electronic ignition ensures reliable starting and running.

Convenient shut-off switch

The convenient engine shut-off switch is located at your fingertips on the handle.

Rugged drive shaft and gears

The long-life precision worm gear transmission, with needle bearings and dust seals, all enclosed within a robust cast aluminium casing.
